

Occupational Earnings in All Metropolitan Areas, August 1990

U.S. Department of Labor
Bureau of Labor Statistics
August 1991

Summary 91-9

Occupational wage studies are conducted by the Bureau of Labor Statistics in 90 metropolitan areas of the United States. Approximately 60 areas are surveyed each year; 32 are surveyed annually and 29 biennially, alternating with the remaining 29 areas in the program. The average weekly and hourly earnings data in this report were derived from information collected in the 60 sample areas surveyed in 1990,¹ appropriately weighted to represent all 326 metropolitan areas in the United States (excluding Alaska and Hawaii) as defined by the Office of Management and Budget through October 1984.

Earnings data in this summary are presented for all metropolitan areas combined, with separate broad regional and industry detail. Selected office; professional and technical; maintenance, toolroom, and powerplant; and material movement and custodial occupations are included. By region, average earnings were generally highest in the West and lowest in the South (tables 1 and 2). Among industry divisions, average earnings were highest in transportation and utilities and lowest in retail trade (tables 3 and 4). These differences in pay levels reflect a number of factors within individual metropolitan areas, such as type of industry, extent of unionization, average size of establishment, and length of service of employees in their current job.

The Area Wage Survey program covers six industry divisions: Manufacturing; transportation, communications, and other public utilities; wholesale trade; retail trade; finance, insurance, and real estate; and selected services. Major exclusions are the mining and construction indus-

tries, health and education services, and government. Establishments employing fewer than 50 workers, regardless of industry, also are excluded. (In 19 of the largest areas, the minimum establishment size is 100 workers in manufacturing; transportation, communications, and other public utilities; and retail trade.)

Individual area bulletins are published upon the completion of each survey. Data on average straight-time earnings and the distribution of workers by earnings intervals are presented for selected occupations and industry groupings. The area bulletins also present information on selected establishment practices and employee benefits including minimum entrance salaries for inexperienced office workers; shift differentials; scheduled weekly hours and days of work; paid holidays; paid vacations; insurance, health, and retirement plans; health plan participation; and other selected benefits. This information on establishment practices and employee benefits is collected every fourth year.

In addition to the Area Wage Survey program, the Bureau conducted 75 wage surveys in 1990 at the request of the Employment Standards Administration of the U.S. Department of Labor for use in administering the Service Contract Act. Although generally similar to the regular area wage surveys, these surveys are more restricted in the number of benefits studied and the amount of detail published for industry groupings. For information on individual area publications, contact any BLS regional office identified on the inside back page.

¹ The average month of reference is August 1990. Data were collected throughout 1990.

¹ Total employment and average earnings for overall classifications may include data for workers not classified by level.

² Earnings relate to regular straight-time salaries that are paid for standard workweeks.

³ The regions are defined as follows: Northeast—Connecticut, Maine, Massachusetts, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, and Vermont; South—Alabama, Arkansas, Delaware, District of Colum-

bia, Florida, Georgia, Kentucky, Louisiana, Maryland, Mississippi, North Carolina, Oklahoma, South Carolina, Tennessee, Texas, Virginia, and West Virginia; Midwest—Illinois, Indiana, Iowa, Kansas, Michigan, Minnesota, Missouri, Nebraska, North Dakota, Ohio, South Dakota, and Wisconsin; and West—Arizona, California, Colorado, Idaho, Montana, Nevada, New Mexico, Oregon, Utah, Washington, and Wyoming.

NOTE: Dashes indicate that data do not meet publication criteria.

Table 2. Average hourly earnings for selected maintenance, toolroom, powerplant, material movement, and custodial occupations, all metropolitan areas, by region, August 1990

Occupation ¹	Total number of workers	All metropolitan areas	Average straight-time hourly earnings ²			
			Region ³			
			Northeast	South	Midwest	West
Maintenance, toolroom, and powerplant occupations						
Maintenance carpenters	9,622	\$15.01	\$13.73	\$13.78	\$16.15	\$15.98
